Dear Hiring Manager,

I'm excited to apply for the Software Engineer Internship at Sports Interactive. As a lifelong gamer with a passion for football and a strong foundation in C++, I'm inspired by your studio's dedication to creating immersive experiences. My background includes:

- Game Development Foundation: Coursework in game design principles, plus experience developing game mechanics at Big Small Games.
- C++ Proficiency: Proven coding skills and debugging abilities honed through coursework and projects.
- Team Player Mentality: Led a successful university app project, demonstrating strong communication and collaboration.

I'm particularly drawn to Sports Interactive for these reasons:

- Legendary Title: Football Manager is an icon, and contributing to its development would be a dream come true!
- Emphasis on Teamwork: Your collaborative culture mirrors my experience and ensures I'll thrive.
- Growth Opportunity: The chance to learn from senior developers and refine best practices is incredibly valuable for my career development.

I'm eager to get hands-on, iterate on existing features, and help analyze projects with a fresh perspective. My understanding of game engine architecture and problem-solving skills will be assets to the team.

I've attached my CV highlighting further qualifications and project experience. Thank you for considering my application – I'm ready to bring my enthusiasm and skills to Sports Interactive!

Sincerely,
Aldric Shaun Rajesh
